

TIP, TUBE & PLATE PCR, LIQUID HANDLING, STORAGE

Quality is the most important criterion in the manufacturing of our products. For this purpose, we have implemented a control system which monitors the physical, chemical and biological quality of our products. The checking of quality starts with the incoming raw material, is continued in production processes and ends with the dispatch of the finished product.

Quality

-  Quality assured PCR products using cutting-edge technology
-  Quality assured Premium products using cutting-edge technology
-  The highest medical grades of virgin resin
-  Products are conditioned then treated with sterile
-  No contamination from unexpected DNase/RNase
-  Limulus amoebocyte lysate(LAL) test result is ≤ 0.06 EU/ml
-  Test for cytotoxicity according to ISO 10993-5;
-  Surface treatment for cell culture
-  Recommend single use
-  Autoclavable
-  qPCR Grade
-  Low-Profile Tube
0.1ml Tube Product
-  High-Profile Tube
0.2ml Tube Product
-  All products carry a LOT number, traced the product's quality
